

VMware Infrastructure Essentials

Supporting your virtualised IT environment

Overview

VMware virtualisation technology can bring many exciting benefits and new capabilities to your business, including dramatic improvements in hardware utilisation, application performance, infrastructure resilience, IT operations, server provisioning, disaster recovery and more. VMware Infrastructure is easy to set up and use, but having an expert guide you as you get started is a great way to help you realise the benefits of this revolutionary technology.

The VMware Infrastructure Essentials is a fast-paced, one-day service that is designed to help you get started on the right foot.

This service provides installation and configuration assistance to make sure that your systems are configured properly. In addition, it includes a technical overview workshop to help make sure that you understand the features and benefits of VMware ESX and VMware vCentre.

Deliverables

Installation and configuration assistance of one (1) ESX host and vCentre

- Interactive workshop focusing on architecture, administration and operations

Benefits

- Accelerate and optimise VMware Infrastructure deployment
- Mitigate risk by leveraging certified consultants and proven best practices
