

Exchange Deployment Planning Service: 15-Day Engagement

Maximising your messaging investment

Overview

The Exchange Deployment Planning Service (EDPS) is designed to provide customers with the processes, tools and expertise to optimise the effectiveness of deploying Microsoft Exchange Server 2010.

The 15-day EDPS engagement is designed for large organisations and provides a deep interactive technical presentation covering Exchange 2010 architecture, planning and deployment. The primary focus and objectives are jointly defined with the customer. A virtual lab is used to demonstrate product functionality and execution of customer scenarios.

Deliverables

- EDPS summary and plan detailing customer challenges, recommendations and roadmap for deployment
- Exchange Server 2010 Lab providing a virtual environment. Deployment will include two virtual machines and Active Directory Domain Controller with Exchange Server 2003/2007 and Exchange Server 2010.
- Vision/Scope document compiled from the engagement questionnaire and customer discussion addressing the current business, technical and operational requirements.
- EDPS Delivery Evaluation Form (optional) to provide valuable data for follow up work and to establish delivery style

Target Audience

Technical and business decision makers requiring an introduction to the features, and functionality of Microsoft Exchange 2010 and potential deployment strategies

Benefits

- The opportunity to leverage an Exchange 2010 expert for deployment planning
- Understanding of architectural and operational aspects of Exchange 2010
- A defined path for Exchange 2010 deployment

Requirements

- Projector to present the slide decks either from the consultant's laptop or from their own machine.
- Meeting room adequate for presentation
- Internet access for remote access to the Exchange 2010 Server labs

Action	Owner
Engagement kick off, customer goals/deployment challenges and business value strategy	All
Exchange Server 2010 features and benefits	Consultant
